### Office Action Summary

**Application No.**

10/528,902

**Applicant(s)**

MALLET, CHRISTOPHER

**Examiner**

Sue A. Weaver

**Art Unit**

3781

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12 May 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 81 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant is advised that it isn't clear what the relationship of a closure on line 2 of claim 81 has with a closure on line 2 of claim 80. This appears to be a double inclusion.

3. Claims 80, 81, 83, 84, 86 and 87 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morash '206 in view of Kornely et al '768, both of record, and Wells '743.

Note Figures 1 and 2 of Morash showing two stacks of components. Note also Figure 6 with a bottom closure. To have further provided the containers with a plastic cover extending down into the container to seal it and protect it and provide for easy separation for stacking purposes would have been obvious in view of such teaching by Kornely et al. To have sealed the covers at the rim to provide a hermetic seal would have been obvious in view of such teaching by Wells.

4. Claims 82 and 114-116 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 80 above, and further in view of Lynch '811, of record

To have used adhesive to secure the cover would have been obvious in view of such teaching by Lynch at 34,

5. Claims 85 and 117 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 80 and 114 above, and further in view of Nemeth '715, of record.

To have formed the cover of Polystyrene for clarity would have been obvious in view of such teaching by Nemeth.

6. Claims 88-94, 103-110 and 118, insofar as they are definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 80, 86 and 87 above, and further in view of Williams et al WO'074, of record.

Williams et al teach the various forms of attachment claimed and to have provided Morash with them for a secure closure arrangement would have been obvious.

7. Claims 94, 96, 97, 101 and 102 rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 80 above, and further in view of Verbovsky et al '053, of record.

To have alternately provided the closure with a spout near one edge and a vent for use by children in the manner of Verbovsky et al would have been obvious.

8. Claims 95-102, insofar as they are definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 94 above, and further in view of Haberman '245, of record.

To have alternately formed the spout with a slit and a vent with a slit to prevent leaking in the manner of Haberman would have been obvious.

9. Applicant's arguments with respect to claim 80 have been considered but are moot in view of the new ground(s) of rejection.

10. Note that the covers of Kornely et al also prevent binding for easier separation and inherently function to prevent contamination which might produces scratches.

Morash already teaches sterile packaging of the stacked containers. Claims 1-79 and 111-113 have been canceled.

11. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
